FAX NO. 1-571273-8300

ATTENTION: JOHN LACYK

Hello John,

Called a little earlier, left message. We need guidance before going to the post office and "overnight" **The 'Amended'** claims from patent application number 10/627/286. Since it's rather difficult for either one of us to make actual contact with the other, Faxing seems to be the best alternative. Here are the questions...and it would be helpful if you could fax back the answers.

1. On the cover sheet reference, We've filled out information we have, but I see no "Docket, Customer or Confirmation number" ?
2. On "Amendment to Claims" regulations ...all corrected identifications are marked [Currently amended] with the exception of 2 which are identified as [New]. As we understand, inclusion of all 32 must be on a single page. 2 different copies are no longer mandatory; however the one copy that is mandatory is the Corrected one which must show a line marking underlying corrected parts. The 'ammeded claims in the listing will replace all prior claims. If there are 2 new claims will they replace cancelled claims? .
3. If a [new]..claim takes the place of a cancelled claim, then the page would have 34 numbers [including the cancelled claims and the new claims] or would we delete the cancelled claims? Put another way, will we mail a single page with all claims on that one page, whether amended, cancelled or new or will we only mail all currently relevant claims?

I'll attempt to call you again one more time before close of business. If we still can't reach, then we will send this fax and and if you are allowed, fax the answers back to us. Otherwise, please call...if we do not pick up simple record the answers on our machine. I cannot mail our final corrections application until we know we've absolutely got it right this time. So we will wait.

Thanks John,

Bill
